Introduction

In a normally warm climate like Maryland's Eastern Shore, extreme winter weather can be very disruptive. As an employee in the Public Works Department, you are one of the dedicated individuals who may be called upon to keep local roads open and respond to emergencies during winter storms.

Just as it is important for our Department to prepare for storms, it is important for you to make preparations as an individual and/or family. Please take the time to sit down with this manual and read it carefully. If you have family members that would be impacted by you working during a storm, please review this manual with them. We want everyone to be prepared at home so we can focus on the job of serving our community.

Safety

Employee safety is our highest priority. During a major storm, however, our obligation to the public means that we may need to work in hazardous conditions. Normally, we will pull crews in from the road when sustained winds reach 45 mph or when wind gusts exceed 60 mph. During winter storms, we may pull crews when visibility becomes extremely limited ("white out" conditions) or when the wind chill factor drops below negative ten degrees Fahrenheit. The Director or Superintendent also may call crews at any time they believe conditions are unsafe. When the Department ceases operations, the Director or Superintendent will call the Emergency Operations Center (EOC) and on-duty personnel will remain in the shop on standby status.

In extraordinary circumstances, we may need to deploy crews to open a road or to take other actions necessary to protect life and property. In those conditions, we will do everything we can to keep our employees safe, but we will also do our best to ensure that the other first responders can accomplish their missions.

Storm Safety Rules

All Departmental employees must obey the following safety rules during a storm event:

1. All Public Works employees will operate in pairs or teams.
2. All employees will wear full Personal Protective Equipment (PPE) when outside the shop during a storm event. PPE shall include a hard hat, gloves, high-visibility

jacket, steel-toed boots, protective eyewear, and any other equipment deemed necessary by a supervisor.

3. When outside during winter weather, all employees must wear appropriate, heavy duty winter clothing.
4. All employees operating vehicles or heavy equipment must keep winter clothing in the vehicle or equipment.
5. Every member of a working pair or team will have access to a 2-way radio.
6. Aerial devices or equipment will not be operated or used when sustained winds exceed 35 mph.
7. When the Director or Superintendent order operations to cease due to storm conditions, all employees will immediately stop work and return to the shop.
8. Crews responding to an emergency will remain on scene until relieved.
9. Crews out of the shop but not on call will return to the shop without delay.
10. Vehicle operators shall not drive through any standing water.

Schedule

Normal – The normal Public Works day starts at 7:00 a.m. and ends at 3:30 p.m. When we have substantial warning of an upcoming storm, we will typically stay on the normal schedule up until the storm is scheduled to arrive.

Extended – When required by storm conditions, we will move to extended schedule. The extended schedule may begin before 7:00 a.m. or go beyond 3:30 p.m. Shifts may run as long as 12 hours.

Full Coverage – During extreme weather, we will move to 24 hour coverage. We have divided Public Works into two teams: Green and Gold. If you forget what team you are on, look at your manual. Green team members will be issued green manuals. Gold team members will be issued gold manuals.

Notification

Due to the unpredictable nature of weather, we may not be able to give employees much notice on schedule changes. Please rest assured, we'll do our best to give you as much time as we can.

When we move to extended or full coverage, we will notify employees several ways. The Director or Superintendent will call employees individually or send text messages.

We will also change the recording on the Public Works telephone line and you are welcome to call your supervisor for more information.

Call Backs

During winter weather, we may have to call back some employees. If we think we may need to call you back into work, we'll try to let you know before your shift ends.

Meals

During normal shifts, employees are responsible for bringing their own meals. During extended shifts, the Department will provide access to food, snacks, and drinks, but will not normally provide meals. During full emergency operations (24-hour coverage), the Department will provide meals.

During winter storms, employees are encouraged to bring personal thermos bottles for keeping hot beverages and/or food. If an employee does not have a thermos, the Department will provide one during the event. When employees are engaged in snow removal operations and cannot return to the Central Shop, the Department will make every effort to provide hot meals and beverages to those employees.

Personal Preparation During Emergency Operations

Some survival experts recommend a "bug-out bag," a small, portable pack containing item that would help one survive for 72 hours when evacuating from a disaster. We encourage employees to bring a winter "bug-in bag" to help stay comfortable and safe during extended emergency operations.

- Heavy duty winter clothing including a warm hat, gloves, and insulating base layers of clothing.
- Two (2) sets of work clothes
- One (1) Coat
- Three (3) extra pairs of socks
- One (1) extra pair of shoes
- A sleeping bag
- A personal flashlight and batteries
- Personal toiletries like soap, toothpaste, toothbrush, and any prescription medications

- Drinking water in bottles or containers and food that does not require refrigeration or cooking
- Cell phone and charger

Pre-Season Checklist

At least one month before the start of the winter season, the Department will:

- Review this manual and make any needed changes.
- Review the Continuity of Operations Plan (COOP).
- Meet with DES Director and staff to review this checklist.
- Review and complete any tasks assigned by DES related to storm preparedness.
- Check equipment readiness including snow plows.
- Check the physical condition of all County buildings.
- Repair any damaged roof areas, windows or doors that could contribute to increased damage during a storm.
- Close all storm windows.
- Check and clean all gutters.
- Check and service sump pumps for basement areas.
- Clean storm drains.
- Check all generators (see list) have been serviced and are working.
- Check batteries and chargers for portable equipment
- Maintain all fuel tanks at no less than three-quarters full.
- Review plans for the relocation of vehicles and equipment.
- Update Department and phone lists for call-in.
- Coordinate special-needs shelters, including staffing requirements.
- Review alternate communication plans in the event of a total system failure.
- Stock food and water in shop.
- Review menu for 24 hour operations/consult with EOC coordinator on food service.
- Inspect roadways/structure prone to frequent flooding.
- Check roadway, evacuation, and shelter signage.
- Review rosters for Green/Gold team assignments.
- Assign and train Public Works personnel assigned to EOC.

- Distribute manual to employees and encourage them to make personal preparations.
- Update roster of family contact information.
- Ask all employees to update emergency contact information with HR.

Pre Event Checklist (S minus 48)

At least 48 hours before a predicted snow or winter storm:

- Top off fuel tanks and apparatus, including spares, chain saws, generators, power units, portable pumps, etc.
- Test and ensure all power equipment is operational.
- Test generators.
- Secure all loose items around the exterior of buildings.
- Ensure all supplies are stocked.
- As needed, have additional supplies delivered.
- If possible, make decision on work schedules and notify employees on the rotation.
- Share as much information as possible with employees.
- Encourage employees to consider evacuation of friends and family to an area outside the storm's impact.

Pre Event Checklist (S minus 24)

At least 24 hours before a predicted snow or winter storm:

- Monitor weather.
- Meet with EOC staff as needed.
- Review any evacuation orders.
- Notify the public if roadway travel in a certain area may be compromised.
- Implement call-back plan, if necessary.
- Deploy assigned staff to EOC as requested.

Winter Storm Operations (S minus Zero)

When the snow or winter storm hits, the Department will move into emergency operations. All work will occur in compliance with the safety rules in this manual. The Director and Superintendents will constantly monitor weather conditions and will cease

operations when conditions become unsafe. All supervisors will ensure staff is using full personal protective equipment and winter clothing. In addition:

- Employees will use caution and obey the limit speed when driving.
- Employees will avoid driving through standing water or into snow berms of indeterminate depth.
- No generators will be used indoors.
- Facilities staff will inspect buildings during the storm to ensure safe operations and to repair any damage.
- Electrical tag-out/tag-in procedures shall be used for any electrical problems or repairs.

White Out-Conditions

A winter “white out” is normally defined as a condition where blowing or falling snow obscures visibility. If the Director or Roads Superintendent determine that white-out conditions exist, crews will be pulled in from the road. Staff will use this opportunity for rest and repair. In extraordinary circumstances, we may need to deploy crews to open a road or to take other actions necessary to protect life and property. The safety of personnel will remain the primary consideration during these operations.

Winter Driving Tips

While many Public Works employees are experienced drivers and/or motor equipment operators, severe winter driving conditions are not routine on the Eastern Shore. Please remember the following helpful tips:

- Always wear your seat belt as required by Maryland law and County policy.
- Slow down and operate equipment well within posted speed limits.
- Be alert and avoid distractions.
- Do not use a cell phone while driving.
- Reduce speed near intersections and near blind corners.
- Keep running and operating lights on at all times.
- Maintain generous stopping distances between your vehicle and others.
- Steer with smooth, precise movements.
- Be aware that bridges decks can freeze before the roadway.

- Promptly report any accidents or property damage including hitting mailboxes during snow removal operations.

Post Event Checklist (S plus 24/48)

After the snow or winter storm passes:

- The Director or a designee will determine when the Department can resume response operations. This decision will be communicated to the EOC.
- Storm safety rules will remain in effect.
- Supervisors will brief teams on potential hazards including live wires down, gas leaks, building fires, unsafe structures, flooding, hazardous materials, traumatized victims, civil disturbance and displaced animals.
- Supervisors will check on and report on personnel including employees in need of medical assistance.
- Check equipment and vehicles for damage and report.
- Check facilities for any damage and report.
- Check for hazardous conditions such as downed trees, downed wires, leaking fuel, etc. and report.
- Treat every downed wire as “live” until status is determined by the appropriate utility.
- Any use of chain saws shall be done with full protective gear including hard hat, safety glasses and face shield, gloves, steel-toed boots, and cut-proof chaps.
- Inspect roads, bridges and culverts and report any damage.
- Close roads as necessary and make report to the EOC.
- Conduct a “windshield survey” including all target hazards identified in the preseason planning.
- Report survey results to the Director and EOC.
- Take digital photographs of any damage or hazardous conditions, however, do not take any risks when documenting damage.
- Employees shall work in teams of at least two persons.

Event Closure (S plus 96)

After normal operations resume:

- The Director will submit a summary report to DES for inclusion in the After Action Report (AAR).
- Meet with staff to discuss hurricane operations and make changes as necessary.
- Coordinate with other agencies on opening of closed roads.
- Restock and resupply as needed.
- Coordinate with risk management to process insurance claims, if any.
- Coordinate with risk management on FEMA reimbursement, if any.
- Review staff performance and discuss with individual employees.
- Attend the AAR briefing.

Appendix C: Generator Locations

Caroline County Public Works – On the north side of the shop	520 Wilmuth Street. Denton, MD 21629
Health & Public Services Building – In the field on the east side of the building	403 S Seventh Street. Denton, MD 21629
General James F Fretterd Community Center – In the garage compound to the north of the building	107 S Fourth Street. Denton, MD 21629
Caroline County Department of Emergency Services – Behind the building	7 N First Street. Denton, MD 21629
Caroline County Department of Corrections – Behind the building through the lower parking lot	101 Gay Street. Denton, MD 21629
Preston EMS – Behind the building	Maple Ave. Preston, MD 21655
Goldsboro Tower – Inside compound	700 Old Line Road. Goldsboro, MD 21636
Caroline County Department of Information Technology – On the north east corner of the building	5 th & Franklin Streets. Denton, MD 21629
Caroline County Circuit Court – Inside basement	109 Market Street. Denton, MD 21629

Appendix D: Buildings

Caroline County Public Works	520 Wilmuth Street. Denton, MD 21629
Health & Public Services Building	403 S Seventh Street. Denton, MD 21629
General James F Fretterd Community Center	107 S Fourth Street. Denton, MD 21629
